

SECURITY ENGINEERING

Company	URL	Product and Features
ArcSight	www.arcsight.com	ArcSight ESM , an enterprise security platform that centrally collects and analyzes security data from heterogeneous devices.
Consul	www.consul.com	Consul InSight Suite , an enterprise security audit and compliance tools bundle. Includes compliance management modules for SOX, GLBA and ISO17799.
elQnetworks	www.eiqnetworks.com	SystemAnalyzer , a browser-based, centralized event management solution designed to collect, normalize, aggregate and correlate security, systems and application log data from enterprise-wide, distributed Windows, UNIX and Linux hosts.
eSECURITY	www.esecurity.com	ES/MS , a network monitoring solution designed to “pinpoint and correct risks to enterprise security.”
GuardedNet	www.guarded.net	neuSECURE , a security management and incident response platform designed to provide centralized log aggregation in heterogeneous security environments, real-time incident detection and integrated tools, among other features.
Intellitactics	www.intellitactics.com	Product Suite includes the NSM Linux-based appliance and Security Manager, which is secured and optimized to work with Enterprise Red Hat Linux ES3.
netForensics	www.netforensics.com	The nFX Open Security Platform provides real-time monitoring and historical analysis of security information.
Network Intelligence	www.network-intelligence.com	Network Intelligence Engine includes EX Series, HA Series and LS Series.
Open Service	www.open.com	Security Management Center includes a security management framework; a Security Threat Manager SIM application; a Security Log Manager compliance solution; and NerveCenter SNMP fault management software.
Protego Networks (recently acquired by Cisco Systems)	www.protegonetworks.com	PN-MARS , a family of threat mitigation appliances designed to help companies identify, manage and eliminate network attacks, and maintain compliance.
Q1 Labs	www.q1labs.com	QRadar (Q1 Labs Real-time Anomaly Detection and Resolution) provides network security overview with intelligent, behavior-based, real-time analysis.
SenSage (formerly Addamark)	www.addamark.com	SenSage 3.0 , a security and compliance management solution, combines real-time event management and correlation with log management and analytics.
