HEALTH IT ISSUES NEAR-TERM AND LONG-TERM

	ONE-YEAR GOAL	BROADER GOAL
BIOTERRORISM	Capability to transmit essential doctor and emergency room visit and lab result data in standard and anonymized format to public health agencies within 24 hours	Implement real-time nationwide public health event monitoring and rapid-response management system
PERSONAL HEALTH RECORD	Deploy prepopulated electronic registrations and medication histories available to target populations	Adoption of personal health record that is easy to use, portable and affordable
ELECTRONIC HEALTH RECORD	Deploy standard and secure means of accessing lab results and their interpretations	Widespread adoption of electronic health record
CHRONIC CARE	Widespread use of secure messaging between patient and provider to track such chronic conditions as diabetes and asthma	Technologies to let providers monitor and assess patients and provide for communications between providers about patients.

AHIC sets dates for health IT pilots

Each pilot of systems for personal health records, bioterrorism information, electronic health records and chronic care must follow this action plan this year

FEBRUARY　　MARCH　　APRIL　　MAY　　JUNE　　JULY　　AUGUST　　SEPTEMBER　　OCTOBER　　NOVEMBER　　DECEMBER

BY MARCH 30
➤ Identify existing technologies that can be rapidly deployed
➤ Identify local, state and federal agencies, and private groups needed to support the technologies
➤ Detail a timeline to complete milestones

BY JUNE 30
➤ Identify current government and business policies that need to be changed or new policies that are required
➤ Consider privacy issues
➤ Review relevant standards architecture and certification criteria and make recommendations to AHIC

BY SEPTEMBER 30
➤ Recommend deployment targets and models
➤ Develop education and awareness plan
➤ Identify a timetable to transition from early components to more comprehensive use versions

BY DECEMBER 31
➤ Implement pilot and recommend rollout plan for the early component versions
➤ Evaluate progress toward comprehensive use versions
