

## EA by the numbers

For Version 1.0 of the enterprise architecture, DHS officials identified multiple systems for each business line that could be candidates for consolidation or integration:

**1,000** servers

---

**1,000** telecommunications circuits

---

**110** applications used for collaboration, communication, tracking or systems management

---

**100** applications to support border security functions

---

**75** modernization efforts

---

**46** legacy applications to prevent or respond to terrorist events

---

**34** projects that aligned with at least one of the Office of Management and Budget's 25 E-Government initiatives or could use the SmartBuy enterprise software buying program

---

**20** enterprise or infrastructure investments

---

**14** initiatives to support credentialing
