MILLENNIA, MILLENNIA LITE AT A GLANCE

WHO RUNS MILLENNIA AND MILLENNIA LITE:
General Services Administration

ESTABLISHED:
GSA awarded Millennia in 1999, Lite in 2000. Millennia expires in April 2009, while Lite will expire in 2010.

PROGRAM MANAGERS:
Jim Ghiloni, acting director for GWAC programs

SERVICES, MILLENNIA
Millennia is designed for "total solution" IT services—that is, the broad scope of IT services, including new and emerging technologies—under three functional areas: software engineering, communications and systems integration.

SERVICES, MILLENNIA LITE
Lite is designed for a system's technology lifecycle. The scope of services cover four functional areas: 1) high-end IT; 2) IT planning, assessments and studies; 3) legacy systems migration and enterprise systems development; and 4) mission support services.

VENDORS: MILLENNIA
Booz Allen Hamilton Inc.
Computer Sciences Corp.
Lockheed Martin Corp.
Northrop Grumman Corp.
Raytheon Co.
Science Appllications International Inc.
SRA International Inc.
Unisys Corp.

VENDORS: MILLENNIA LITE
Functional area 1
Abacus Technology Corp.
Calibre Systems Inc.
Data Networks Corp.
General Dynamics IT
SI International Inc.

Sytex Inc.

Functional area 2
American Systems Corp.

Functional area 4
Allied Technology Group
BTG Inc.
CACI International Inc.

FC Business Systems Inc.
General Dynamics IT
Keane Federal Systems Inc.
Madison Research Corp.
Northrop Grumman Space and Mission Systems
Signal Solutions Inc.
SRA International Inc.

FEES
GSA charges a contract access fee of 0.75 percent. If FEDSIM's assisted services are used, CAF is capped at $25,000 for Millennia. FEDSIM's service fee is additional, which varies from a $300,000 fixed price for Millennia to an hourly rate for Millennia Lite.

HOW TO ORDER:
A customer agency can directly award task orders upon receiving proper delegation of contracting authority from GSA.

A client agency can use FEDSIM's assisted services to award task orders.

There is no ceiling for task orders; however, the Millennia GWAC has a total capacity ceiling of $25 billion and Millennia Lite has a contract ceiling of $20 billion.

WHAT OTHER GWACS OR MACS COMPETE?
Millennia does not compete against other GWACs, internal or external; it complements other GWACs, GSA says. Millennia is specifically designed for large, complex IT programs and projects that other GWACs are not well-suited to handle.

On a limited scale, two pending IDIQ multiple-award contracts—the Homeland Security Department's Eagle and the Army's Total Engineering and Integration Services 2, when they are actually awarded—would compete for some of the same IT business.

Millennia Lite competes with other GWACs and multiple-award contracts including, but not limited to, the Army's Total Engineering and Integration Services 2, the Commerce Department's CommITS NextGen and GSA's own IT schedule.

WHAT'S NEXT FOR MILLENNIA AND MILLENNIA LITE?
GSA is merging the contracts into the new Alliant GWAC, which will be awarded in 2007.
