What agencies have on tap to meet the president's e-government push

Project	Agency	Goal
OMB's e-gov 24 **Government to citizen**		
USA Service	GSA	Let citizens personalize a combination of services from multiple programs and agencies in a privacy-protected environment
EZ Tax Filing	Treasury	Ease tax return filing for individuals and businesses via the Web
Online Access for Loans	Education	Help individuals and businesses find loan programs for which they qualify and give them direct access to the loan process
Recreation One-Stop	Interior	Provide a searchable database of recreation areas nationwide, with maps and integrated transactions such as reserving campgrounds
Eligibility Assistance Online	Labor	Create a common access point for information on federal benefit programs and provide direct access to eligible citizens
Government to government		
E-Vital	SSA	Expand online data exchange of vital records between federal agencies and state governments
E-Grants	HHS	Create a portal for agencies and grant recipients to streamline the grants process and support electronic grants management
Disaster Assistance and Crisis Response	FEMA	Create a portal for information on disaster preparedness, response and recovery, and other emergency data
Geospatial Information One-Stop	Interior	Provide a single gateway to spatial data so federal agencies can coordinate planning and share info with state and local agencies
Wireless Networks for Emergency Communication	Treasury	Establish interoperable communications standards for public safety officials at federal, state and local levels
Government to business		
Federal Asset Sales	GSA	Help customers find financial, real or disposable assets and bid on or purchase them electronically
Online Rulemaking Management	Transportation	Provide around-the-clock access to the rule-making process and create a governmentwide system for agency dockets
Simplified and Unified Tax and Wage Reporting	Treasury	Decrease the tax forms an employer must file, provide tax info, expand online filing and model simplified tax employment laws
Consolidated Health Informatics	HHS	Develop a plan for a system for agencies, health care providers and insurers to share and reuse medical records
Business Compliance One-Stop	SBA	Supply information, wizards and tutorials to help users understand laws and regulations and process many permits online
International Trade Process Streamlining	Commerce	Create a single site for facilitating the export process and provide single point of access to 20 sites
Internal effectiveness and efficiency		
E-Training	OPM	Create a repository of government-owned training courseware for use by federal, state and local organizations
Recruitment One-Stop	OPM	Modify USAJOBS.gov to automate recruiting, career postings, resume and assessment tools, and applicant status info
Enterprise HR	OPM	Eliminate paper employee records, allow electronic transfer of human resources data, and streamline reporting and data analyses
E-Travel	GSA	Give all agencies a common travel management system
Integration Acquisition	GSA	Create common data elements and provide logistics, payment and performance assessment tools
E-Records Management	NARA	Establish standards for electronic record-keeping, including an Extensible Markup Language prototype
E-Payroll	OPM	Simplify and unify elements of the payroll process to consolidate and integrate payroll systems with HR systems
Addressing barriers to e-government success		
E-Authentication and Digital Signatures	GSA	Establish a level of authentication that engenders trust in e-government initiatives and develop a federal enterprise architecture
