

Enterprise architecture tools go beyond office automation

Company	Product	Platforms	Functionality	XML Support
Aleri Inc. Chicago 312-540-0100 www.aleri.com	The Aleri Information Engine 2.5 (composed of Aleri Modeler, Aleri Analysis Engine, Aleri Adapters)	Win2000, Sun Solaris; future versions planned for Linux, HP-UX and 64-bit Unix	Vector software program that processes data from disparate systems, applies complex business logic and aggregates data for near real-time analysis	Uses generic, standards-based adapters and messaging platforms to import data from RDBMSes and middleware in XML format; once it has been imported data is compressed, vectorized, indexed and available for high-speed manipulation
Computas Inc. Sammamish, Wash. 425-391-2000 www.computas.com	Metis Enterprise 3.3	Win98, NT, 2000, XP; databases: SQL Server, Oracle, Teradata (on request)	Provides visual model development, and publishing and repository management; can be used to model any aspect of enterprise architecture required; lets architecture models created by lower-level agency organizations be integrated with higher-echelon models	All major World Wide Web Consortium standards; can create XML schemas and use those schemas to control the architecture model designs; can implement any XML language standard at the meta level
Computer Associates International Inc. Islandia, N.Y. 800-225-5224 www.ca.com	AllFusion Process Modeler	Win 98, 2000, XP	The BPM element of the AllFusion modeling suite provides for integrated data, flow and process modeling and modeling collaboration; ER Win data models can be validated against the Process Modeler BPM models; validation of models, integration with data modeling tools to export to application environment	n/a
Knowledge Based Systems Inc. College Station, Texas 979-260-5274 www.kbsi.com	ProCap 6.0 and ProSim 6.0	Win 3.1 up	Process modeling and simulation tool with XML, HTML and Visio generation; Version 7.0, due soon, will support Java applet generation for viewing	Supports XML as a standard data format
Magna Solutions GmbH Quebec 800-361-0528 www.magna-solutions.de	SilverRun-BPM 2.7.6	Windows 9x, NT, 2000, XP	Business process modeling integrating the business perspective with the enterprise data architecture; provides cross-reference reports for resource usage, cost and time allocation, and roll-up providing comprehensive business process analysis	n/a
	SilverRun-ModelSphere 2.0	Win9x, NT, Me, 2000, XP; Linux, Sun Solaris	Combines process, data and UML modeling, and provides a flexible model management environment; provides cross-reference reports for resource usage, cost and time allocation and roll-up providing comprehensive business process analysis	Can generate XML files, Java classes and DDL files
Microsoft Corp. Redmond, Wash. 425-882-8080 www.microsoft.com	Microsoft Visio Professional 2002	Win 2000 Professional (recommended)	Helps create technical and business diagrams in a customizable, distributable form; includes flowchart support and serves as a platform for development of business process modeling	Data in Visio diagrams can be extracted to text files, Microsoft Excel, Access, SQL Server or other ODBC data sources, XML or HTML via automated data export wizards
Popkin Software & Systems Inc. New York 800-732-5227 www.government.popkin.com	System Architect 9.0	Win98, Me, NT, 2000, XP	Includes business, process, data, system, XML Schema, object and component modeling; Framework Manager front end, which gives a clear picture of your enterprise architecture; a central shared information repository (MSDE & SQL Server 2000); integrated framework support; database model synchronization for Oracle 8 and Microsoft SQL Server; XML and HTML style sheets, XML interface to UML	Includes a graphical XML schema editor, which allows users to create, manage and deploy XML schema in diagramming environment; supports BizTalk and DTDs
Rational Software Corp. Lexington, Mass. 800-728-1212 www.rational.com	Rational Suite AnalystStudio	Win98, Me, NT 4, 2000, XP	Combination of tools for visual modeling, requirements and use case management, defect and change request tracking and industry-proven best practices	n/a
Remedy Corp. Mountain View, Calif. 650-903-5200 www.remedy.com	Action Request System 5.1 Remedy IT Service Management 5.5 Remedy Customer Service and Support	Windows, Solaris, HP-UX, AIX, Redhat Linux; Databases: Oracle, Microsoft SQL Server, IBM DB2, Informix, Sybase	Provides workflow modules commonly used in managing service requests; has workflow-based architecture, drag-and-drop user interface, pre-built service-management modules for notifications, escalations and approvals; lets developers author Web pages without programming	Data can be exported in XML format; applications and data from external sources can be published as Web services
Wizdom Systems Inc. Naperville, Ill. 630-357-3000 www.wizdom.com	ProcessWorks (6th generation)	Win9x, NT, Me, 2000, XP	Process modeling tool for experts lets you visualize current processes and business requirements, and develop "what-if" models	n/a
WRQ Inc. Seattle 800-872-2829 www.wrq.com	Verastream Host Integrator 4.5 Verastream Integration Broker 9.0	Windows, Solaris	Service-oriented integration platform lets both business processes and granular functions be assembled from smaller components	All XML formats
