THE INDEPENDENT VOICE  
OF THE MICROSOFT IT COMMUNITY

## The Independent Voice of the Microsoft IT Community

*Redmond* has a laser focus on the Microsoft IT community. While we are bullish on Windows technology and Microsoft applications, we are adamant about telling the true story-what works, what doesn't, what costs too much, what gives great value. We walk in Microsoft IT shoes, and that perspective drives every page and every word of our magazine.

A true IT publication represents its readers and answers only to its readers. Through constant, unceasing interaction with readers, *Redmond* identifies key issues, problems, and new technologies that offer critical advantage. When readers have a problem, *Redmond* investigates and pushes for solutions. When important technologies emerge, *Redmond* examines the business case, defines the technology, and counsels readers on adoption.

## Editorial Mission

*Redmond* magazine is the authoritative, independent voice of the Microsoft IT community, and provides real-world technical, product, news, and industry information for experienced Information Technology professionals working within a Windows platform computing environment. Our readers are the decision drivers of the industry and include IT managers, network managers, network administrators and system administrators. These technology leaders establish and drive the technical goals of their organizations, buy and recommend specific solutions to achieve these goals, and manage the implementation, integration and maintenance of the technology.

Our editorial mission is to provide readers with the information, strategies, and behind-the-scenes insight into Microsoft and the Windows computing platform so they can make better informed decisions regarding their organizations' IT infrastructure.

## Features and Columns

### Product Coverage

Keeping the Windows infrastructure running smoothly requires a heavy dose of third-party help. Yet there are literally hundreds of solutions that address the technology needs of those who manage the network. Our voluminous reviews and product comparisons spell out the criteria readers should use in evaluating their technology purchases and provide real-world judgments on how effectively these tools do their jobs.

### Your Turn

This is an all new approach to product reviews. Here we create a formal review framework, but fill in these categories with real-world customer experiences, rather than the results of a single lab evaluation.

### Beta Man

This column, by noted Microsoft expert Don Jones, will put pre-release versions of major Microsoft products and third-party products through their paces. This will help readers evaluate upcoming products, and plan for their possible use.

## Security Advisor

Just as network breaches morph monthly, so too must the techniques our readers use in maintaining the security of their infrastructures. Security authority Joern Wettern shares insights about tools, methodologies and strategies for keeping an organization's data, servers and clients safe in this monthly examination of Windows security.

## Mr. Roboto

Systems engineers have little to no spare time in their work days. Where they can streamline, they do. Scripting and automation expert, Don Jones, will show readers how to automate common Windows administrative tasks.

## Marching Orders

IT often knows what to do, but sometimes needs a gentle shove to actually do it. Marching Orders will highlight key, but sometimes neglected issues, and press IT to take action. Examples include consolidating servers and storage, which many have put off, implementing multiple layers of security, carefully analyzing vendor ROI claims, and negotiating better terms with vendors.

## Foley on Microsoft

Noted Microsoft watcher Mary Jo Foley has joined *Redmond* as our back page columnist. Foley has covered Microsoft for some two decades as a longtime writer for *PC Week*, and now the editor of her own site, *Microsoft-watch.com*. Every month Foley offers the insight that only a true veteran can provide.

## Windows Insider

This highly technical column by Windows heavy-weight Greg Shields, delves into the inner workings of the Windows operating systems and applications, to provide valuable insights on deployment, integration and support.
